

AI-POWERED LEGAL SUMMARY GENERATION

CASE STUDY

Enhancing legal summary generation through AI-powered chatbot automation.

AT A GLANCE

CHALLENGES

- Time-intensive process
- Consistency and accuracy
- Resource limitations
- Meeting client expectations

BENEFITS

- Enhanced customer engagement
- Efficient inquiry handling
- Improved client experience

“

The solution was a state-of-the-art AI chatbot, developed in-house. It leveraged cutting-edge natural language processing to understand and summarize complex legal texts. The chatbot was integrated into the company's workflow, providing a seamless transition from manual to automated summarization. With its integration, legal teams **doubled their productivity.**

OBJECTIVES

The primary objective was to revolutionize the process of summarizing legal decisions. Faced with the time-consuming task of manual summarization, the goal was to implement an AI-driven solution that could enhance efficiency and accuracy, improving the productivity of the writing team.

SOLUTIONS

To address these challenges, we proposed the development of an AI-powered chatbot.

- **Automated Summarization**
- **Automated Formatting**
- **Speed and Accuracy**

BENEFITS & IMPACT

Increased Efficiency

Automated summarization drastically reduced the time needed for each legal document.

Enhanced Accuracy

Advanced AI algorithms ensured high precision in the summaries and its formatting.

Scalability

The solution is enabled to handle larger volumes of work without additional manpower.

Speed Improvement

The AI solution doubled the work handling capacity, effectively improving operational speed by 100%.
